Complaint Details:

The secondary carton for the above batch shows the storage statement "Store below 25 C" while the blister foil printed on the same batch states "Store below 30 C". Retail pharmacists in two districts have queried the discrepancy. There is no impact on tablet appearance, count or identity. No adverse events have been reported. We have stopped further dispatch of the batch from our Nagpur warehouse and request a corrected artwork confirmation and a plan for the stock already in trade.
